

#950 Advanced Implant Therapy:

Live Patient Demonstrations and Hands-on Workshop

November 08 - 12, 2010

Monday-Friday

9:00AM-5:00PM

This 5-day advanced course focuses on LIVE patient demonstrations with several implant surgeries. These live patient treatments are supported with case presentations and post-treatment discussions. The course is filled with clinical oriented lectures, evidence based round table discussions and pig jaw hands-on workshops. The course is targeted towards the clinician with experience in implant therapy and is designed to increase the knowledge and comfort level in soft tissue management, bone and sinus grafting, aesthetic implant placement and advanced implant treatment planning and complex case management. The course is supported by broadcast quality video with real-time interaction with the surgeon to optimize the learning objective and the viewing of clinical details.

Required Instruments for Hands-on session

Course Format:

- Lectures
- Live surgery demonstrations
- Video demonstrations/Web Lectures
- Hands-on clinical lab workshop
- Round table discussions
- All lectures are in English

Topics:
